PIYUSH SINGH

Full Stack(MERN) Developer | Computer Science Student (Gurugram, Haryana)

+91 9393606075 | piyushsinghrajput9939@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience as a MERN Stack Developer Intern, contributing to a SaaS-based application using the MERN Stack (MongoDB, Express.js, React.js, Node.js). Skilled in designing REST APIs, implementing JWT authentication, and building responsive UIs with React.js and Tailwind CSS. Seeking a Full Stack Developer Internship or Entry-Level Software Developer role to contribute to scalable, high-quality web applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C++

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, TenStack Query, Redux Toolkit, Context API

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman

PROJECTS

AI Virtual Assistant

- Built a full-stack AI assistant integrating **Gemini API** for real-time intelligent responses with JWT authentication.
- Integrated **Speech Recognition** and **Speech Synthesis APIs** for hands-free voice interaction.
- Designed RESTful API endpoints with Express.js using MVC architecture.

Applicant Tracking and Recruitment Management System

- Built a **SaaS-based Recruitment Platform** using MERN, supporting job postings, candidate tracking, interview scheduling, and recruitment workflows.
- Developed an automated resume screening pipeline using **pdf-parse** to extract candidate information from uploaded PDF resumes, reducing manual screening effort.
- Integrated **Google Calendar API with OAuth2** for interview scheduling and Google Meet invitations, with an interactive drag-and-drop calendar using FullCalendar.
- Implemented **Redux Toolkit** and **TanStack Query** for centralized state management and efficient API data fetching, alongside RBAC and JWT authentication, cloud file storage with **Cloudinary**, and automated offer-letter PDF generation using **Puppeteer**.

E-Commerce Platform with Admin Panel

- Built MERN-based e-commerce platform featuring user authentication, product management, shopping cart, wishlist, orders, checkout, and an admin dashboard.
- Designed RESTful APIs and optimized MongoDB schemas to efficiently manage products, orders, and inventory and **dynamic data management**.
- Integrated **Razorpay** payment processing with server-side verification and **MongoDB transactions** for secure order processing.

TECHNICAL EXPERIENCE

MERN Stack Developer Intern | Tech Jose April 2026 – August 2026

- Worked on a **SaaS-based Hostel and PG Management** application using the MERN Stack.
- Built and maintained frontend features using React.js, Tailwind CSS, **Redux Toolkit,** and **TanStack Query.**
- Developed and integrated **RESTful APIs** using Node.js, Express.js, and MongoDB, implementing **multi-tenant functionality** including tenant-specific data handling across application modules.

EDUCATION

B.Tech — Computer Science Engineering *2023 – 2027*

DPG Institute of Technology and Management, Gurgaon | CGPA: 7.3 / 10

ACHIEVEMENTS

- Solved **140+** Data Structures & Algorithms problems on LeetCode.
